Summer Term 2

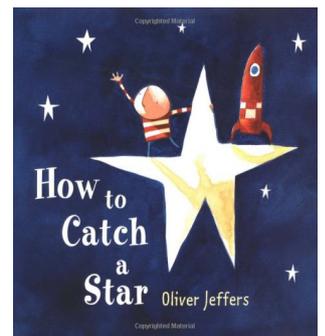

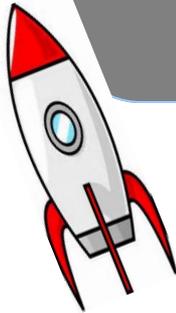

This term we will be looking at Space

Here are some things you can do with your child;

- * Visit the library and look at books about space
- * Design an alien
- * Visit the Science Museum and have a look at the rockets there

Hopefully the sun will come out to play this term. Please remember to use sun cream and to bring a hat for your child. No flip flops please, they are not safe for running and playing.

This term some children will be celebrating Eid. It is a special time for Muslims and we will be looking at this in class.

Mathematical Development

In class and in the playground we will be looking at shapes in the environment and talking about their properties.

As we are learning about space we will be talking about distance and measurement. You should continue to talk to your child about money and the value of coins.

Personal, Social and Emotional Development.

We will be talking about being brave and handling change as the children begin to get ready to go into Year 1

Literacy

When looking at books with your child please ask them to talk about their favourite characters, what happened in the story, what they think might happen? Ask your child to tell you a story, can they write it down?

Understanding The World

Space is very dark, we will be looking at the difference between light, dark and shadows. We will be programming electronic toys.

This term we will be using water play resources, your child will need wellingtons. If you have any old wellies that your child has grown out of could you bring them in please?

Exploring shadows

Exploring distance

Exploring the environment

Please continue to look at books with your child and to read with them. It is a lovely way to spend 10 minutes

talking about the pictures and/or the story. Thank you for all your support this year, teaching really is a team effort! If you have any questions please talk to your class teacher.
